GENERAL AND REVENUE DEPARTMENTS.

G. O. No. 355-414—D, dated 25th January 1924.

Relief of Distress.

Issues further instructions regarding the measures for the relief in the affected tracts of Kolar and Tumkur Districts.

READ—

Government Order No. 49—63, dated 26th December 1923, reviewing the measures for the relief of distress already adopted and sanctioning additional grants for the different classes of works.

2. Inspection Notes of the Dewan and the Second Member of Council, relating to their tours in the affected tracts.

ORDER NO. 355-414—D, DATED 25TH JANUARY 1924.

In the order of 26th December 1923 read above, Government issued detailed instructions as regards the measures to be adopted for the relief of distress and sanctioned additional funds for the various classes of works. In the light of subsequent developments and the circumstances brought to notice as a result of the tours made by the Dewan and the Second Member of Council in the affected tracts of Kolar and Tumkur Districts, Government are pleased to issue the following further instructions in the matter:—

2. *Tank Restoration.*—In the Government Order of the 26th December 1923, Government observed that no tank restoration works—either major or minor,—need be undertaken for the present outside the budget programme. If, however, in any particular locality, suitable tank maintenance or village improvement works were not available and it was considered necessary to start restoration works to afford employment to the people, the Chief Engineer for Irrigation was requested to submit, in consultation with the Revenue Commissioner, proposals with detailed estimates for sanction. It is reported that the restoration of the minor tank at Thadi in the Maddagiri Taluk should be started immediately for affording employment to the people of Ittigedibanahalli Hobli where other suitable works are not available. As this tank is situated close to this locality, Government direct that the work be taken up at once by the Public Works Department. A fourth of the cost, subject to the maximum prescribed under the Minor Tanks Restoration Regulation, should be recovered from the holders of lands below the tank. The programme of Tank Restoration Works called for in paragraph 4 of the Government Order of 26th December 1923, should be submitted by the Chief Engineer before the end of February next.

3. *Tank Maintenance Works.*—In the Government Order of 26th December 1923, Government directed that, as regards tank maintenance works in which the expenditure exceeded one year's assessment, the estimate should be submitted for the sanction of Government. It was, however, ordered that such works which in view of the urgency of the situation had already been started might be proceeded with, a list of such cases being submitted to Government before the 15th of January 1924. Up till now only the list from the Deputy Commissioner of Tumkur has been received. It is observed that of the works which have already been started there, in 44 cases, the estimated amount is more than a year's assessment, the net liability of Government on this account being Rs. 34,417. From the weekly reports received from the Deputy Commissioner it does not appear that much progress has been made in the execution of these works. In carrying out these works care should be taken that only such works are taken up as can reasonably be completed before the end of the official year. If anywhere these works have not attracted

labour, the works should be closed at once unless there is a fair likelihood of labour forthcoming in the near future. The main object to be kept in view is to see that works are not promiscuously started without reference to actual requirements, as that will only lead to the multiplication of incomplete works. Government further direct that as each tank work is completed and handed over to the Patel for future upkeep, a statement showing the names of the Khatedars under the tank, the total cost of maintenance work done, the portion recoverable from the raiyats and its apportionment among the khatedars should be prepared and placed on the record The amount payable by each individual should be added to his Khate.

4. *D. P. W. Allotments.*—It is observed that a clear account is not maintained of the allotments for the different classes of works that have been placed at the disposal of the Executive Engineer, and that expenditure is being incurred out of the imprests without reference to the allotments sanctioned. As this practice is likely to lead to considerable confusion in accounts, Government direct that both the Executive Engineers and D. P. W. Sub-Division Officers should keep clear accounts of the allotments for the different classes of works and adjust promptly the expenditure incurred out of imprest by debiting it to the proper heads against the available allotments, which must be communicated to Sub-Division Officers by the Executive Engineers.

5. *Village Improvement Works.*—In paragraph 5 of the Government Order of 26th December 1923, Government directed that the waiving of contribution should not be encouraged and that it should be sanctioned only in extreme cases in which the Revenue Commissioner considered a relaxation of the rules necessary. It is reported that the procedure of obtaining the Revenue Commissioner's orders to waive the contribution involves much delay and that consequently the commencement of works has in certain cases been greatly delayed. In regard to badly affected taluks Government will be pleased to consider the question of investing the Revenue Sub-Division Officers with the power to waive contribution in really deserving cases. The Sub-Division Officer of Maddagiri is hereby authorized to waive the contribution on account of Village Improvement Works in villages in Maddagiri if he is satisfied that the raiyats are unable to pay the contribution. He will exercise these powers subject to a total maximum amount of Rs. 500 for the present. These powers should not be exercised except in urgent cases. As regards the sanctioning of the Village Improvement Estimates, as the existing procedure under which the estimates are sanctioned by the Deputy Commissioners is found to lead to much delay, Government consider that Revenue Sub-Division Officers may be given the power of sanctioning estimates up to Rs. 100 in the affected areas. The Sub-Division Officer of Maddagiri is immediately invested with this power in regard to Maddagiri Taluk for the present. It is observed that payment of bills for Village Improvement Works has not been as prompt as it should be and that in the Maddagiri Taluk, the amount disbursed falls much short of the amount for which work has been done. Government therefore direct that the Amildars should see that payments are made more promptly in future.

6. *Irrigation Wells.*—In paragraph 11 of Government Order of 26th December 1923, Government sanctioned an establishment of small staff consisting of a Well Overseer with necessary tools and plant for affording assistance to the raiyats to repair the existing irrigation wells and sink new ones. Government desire to emphasize the importance of this work which should be developed to the maximum extent possible in the present season. Government are pleased to sanction an Overseer on a pay of Rs. 40 a month for the Maddagiri Taluk to prepare estimates for the wells to take measurements of work done and to enable the Amildar and Sub-Division Officer to determine the amounts to be sanctioned as loans and the payments to be disbursed from time to time.

7. *Loans.*—Government have already sanctioned a large allotment of Rs. 2,25,000 for Takavi, Land Improvement and Subsistence Loans in the affected districts. It is reported that the allotment given for the Maddagiri Taluk has been nearly exhausted and that a sum of about Rs. 50,000 more is required to meet the existing demand. From the statement received from the Revenue Commissioner on the 21st January 1924, it is seen that there is a sum of Rs. 72,000 still un-allotted out of the amounts sanctioned till now. It is therefore unnecessary to

sanction any additional grants for loans. The Revenue Commissioner is requested to place a sum of Rs. 30,000 at the disposal of the Deputy Commissioner, Tumkur for use in the Maddagiri Taluk. Loan applications pending should be carefully investigated and promptly disposed of.

8. *Gratuitous Relief.*—At present the expenditure on this account is met out of the imprests placed at the disposal of the Amildars of the affected taluks. A sum of Rs 2,200 (Rs. 1,000 each to the Deputy Commissioners of Kolar and Tumkur Districts and Rs. 200 for Bangalore District) has been sanctioned out of the sum of one lakh of rupees sanctioned in the Government Order, dated 22nd November 1923. Government are pleased to sanction an imprest of Rs. 250 to the Sub-Division Officer of Maddagiri to enable him to make grants for gratuitous relief, the expenditure incurred by him being debited to the grant of 1,000 rupees already sanctioned for the Tumkur District.

9. *Relief to Weavers.*—It is reported that the weavers of Maddagiri stand in urgent need of relief and that the local Co-operative Society has come forward to afford them the required assistance, if Government give the Society necessary funds without interest. Government are pleased to sanction a sum of Rs 3,000 as loan to the Maddagiri Co-operative Society, free of interest, to enable it to make advances to weavers in need of relief. The amount will be repaid by the Co-operative Society within a period of two years from the date of disbursement.

10. *Relief to the Amildar of Maddagiri.*—As the seasonal conditions in the Maddagiri Taluk are reported to be unsatisfactory and the Amildar has to be constantly on the move to keep in touch with the situation, to start works, to make payments, etc., it is necessary to relieve him of his magisterial and current routine work. Government are pleased to sanction the appointment of a Deputy Amildar to the taluk temporarily up to the end of June 1924 who will be invested with 3rd class magisterial powers.

11. *System of work.*—Government observe that a uniform procedure has not been followed in the affected districts as regards the system of execution of works under the Department of Public Works. In the Kolar District, the works are carried out under the ordinary contract system whereas the system adopted in the Tumkur District is mid-way between contract and amani, the man in charge of each work being given a fixed monthly pay of Rs. 15 plus a nominal commission of about 1½ per cent on the expenditure incurred for the work. The expenditure in Tumkur is reported to be lower on account of the system of work followed there, but as against this, the necessity for issue of tools has been felt. In the Kolar District, the contractor supplies the tools but, to cover this expenditure, he is allowed a suitable margin of profit on this account. At the present stage when the actual outlay on works is yet comparatively low, the balance of advantage seems to be in favour of the Kolar system. Government consider that the system of work should be uniform, and are pleased to direct that the Chief Engineer for Irrigation should examine the two systems at once and issue definite orders as to which of them may be adopted.

12. *Wages.*—The general principles to be observed in fixing wages have been enunciated in paragraph 12 of the Government Order, dated 26th December 1923. Government direct that the wages should be so regulated that an average adult cooly working about 8 hours a day earns at least four annas, and in fixing the rates a certain amount of discretion should always be exercised by the Executive Engineer, regard being had to the variation in the price of ragi in the neighbourhood of any particular work.

13. *Returns.*—It is necessary to maintain for each work a detailed statement of the number of coolies employed and the quantity of work turned out, by the man in charge of the work, and these statements should be compiled and tabulated once a week in a register to be maintained by the Assistant Engineer so that information regarding the progress of each work may be readily available at any time. A similar register should be maintained by the Amildar in respect of works done under the supervision of the Revenue Department, for ready reference of the officers of the Department.

14. *Tools.*—Government consider that it is unnecessary for the present to issue tools to the coolies working on the relief works. As, however, representations

have been made that the Panchamas do not possess tools of their own and that they will be shut out from the works if they are not given tools, Government direct that the Public Works Department may issue tools to Panchamas, as a special case, but care should be taken that the tools are returned after the work is completed.

15. *Maintenance of Accounts.*—It is reported that the accounts relating to the Relief Works under the Revenue Departmentare are not properly kept. Government have in their Order No. D. 245-55, dated 16th January 1924 approved of certain forms and other suggestions made by the Comptroller for the maintenance of accounts in the taluks. The Comptroller is requested to issue necessary instructions to see that the accounts are properly maintained in accordance with the Government Order referred to above. Expenditure incurred out of imprests should be adjusted promptly by final debit to the proper heads.

16. *Throwing open Date Groves.*—Various measures such as cutting and stacking hay in malnad forests, supply of paddy straw from the Mysore District and establishing experimental feeding camps have already been sanctioned by Government at a cost of Rs. 1,50,000. It is reported that there is a great demand for date leaves for being used as fodder for cattle in the Tumkur District. Government direct that, in respect of date groves in which the number of trees exceeds the needs of the department for the current as well as the next year, such portio is as may be necessary for the requirements of the Department should be reserved and the rest made available for the use of the raiyats. The portions to be thus made available should, in each case, be decided after a joint inspection by the Sub-Division Officer and the District Excise Officer and in cases of difference of opinion between them, the matter should be decided by the Deputy Commissioner.

17. *Special works for Maddagiri Taluk.*—As the demand for labour is reported to be increasing in Maddagiri Taluk, Government are pleased to direct that the following works may be undertaken at once. The Chief Engineer for Roads and Buildings is requested to get up estimates for these works and to arrange for their being started as early as possible.—

(1) Maddagiri-Hindupur Road—This has been already sanctioned and orders will be passed separately.

(2) Improvement of Maddagiri-Ittigedibbanahalli cart-track estimated to cost Rs. 2,700.

(3) Improvement of Hosakere-Ittigedibbanahalli cart-track estimated to cost Rs. 1,200.

Government are pleased to direct further that, in the Midagesi, Ittigedibbanahalli, Kodagenahalli and Puravara hoblis, tank maintenance works which have already been started may be proceeded with even if the estimates exceed one year's assessment. A list of such cases with copies of the estimates should be submitted forthwith for the orders of Government.

18. *Programme of Works.*—Government consider it necessary that a programme of new works must be kept ready to be taken up in case necessity arises for it. They are therefore pleased to direct that the Revenue and Public Works Departments should, after mutual consultation, draw up a programme of works under Tank Restoration, Tank Maintenance, Well Works and Village Improvement Works for each hobli in the affected Taluks and submit the same for the information of Government before the end of February 1924.

GENERAL AND REVENUE DEPARTMENTS.

G. O. No. 49-63 -D., dated 26th December 1923.

Measures for relief of Distress

Reviews the —— already adopted and issues further instructions placing additional grants for the purpose.

READ—

G. O. No. R. 2582-93—R. M. 11-23-104, dated the 7th December 1923, passing orders on the measures to be taken to afford relief in the affected parts of Kolar, Tumkur and Bangalore Districts, and sanctioning an additional sum of Rs. 25,000 for subsistence loans and a further grant of Rs. 10,000 for tank maintenance works.

2. G. O. No. I. & C. 3686-96—Ft. 205-23-2, dated 8th December 1923, directing the Conservator of Forests to make arrangements for cutting grass in the Malnad forests for supply to the affected districts.

3. G. O No. 28-37—R. M. 11-23-126, dated 19th December 1923, sanctioning an additional allotment of Rs. 40,000 for the grant of Takavi and land improvement loans.

4. Proceedings of the meeting of the Deputy Commissioners of the Bangalore, Kolar and Tumkur Districts and certain select heads of departments held in the Public Offices on the 21st and 22nd December 1923, under the presidency of the Dewan at which the present situation and the measures necessary for providing relief were discussed.

ORDER No. 49-63—D., DATED 26TH DECEMBER 1923.

From the reports received from the Revenue Commissioner and the Deputy Commissioners of Bangalore, Tumkur and Kolar, it is found that in about 610 villages in Kolar District, 733 villages in Tumkur District and in parts of the Bangalore District seasonal conditions owing to the failure of the North-East monsoon are not satisfactory. The outturn of the Ragi crop has been very poor, and owing to the tanks not receiving any water Vaisakhi rice cultivation has been rendered impossible. The main features of the situation now are a serious scarcity of fodder and water for men and cattle. The prices of food grains are reported to be high, but as the unfavourable conditions are not general and are confined to only a small portion of the State, supplies of food grains in the market at present are adequate. The demand for labour has however been felt by the population in the affected tracts. The gathering in of the harvest—small as it has been—is at present affording the people a certain measure of employment. But when this is completed the demand for labour is likely to develop. It is therefore necessary that adequate provision should at once be made to start tank maintenance, village improvement and other useful public works so that the people may be able to earn their livelihood. With a view to secure this object, Government have already issued orders to the Deputy Commissioners and the Executive Engineers to push on actively all works for which provision has been made in the budget. Additional grants have been sanctioned for expanding tank and village works and also for excavating temporary wells in tank beds. Strict instructions have been given to grant takavi loans liberally, and substantial additions to the amounts provided in the budget for the different classes of works have been made. In regard to the supply of fodder, depots were opened in parts of Kolar and Tumkur Districts, but as the supplies were scanty and the prices beyond the means of the average cultivator, they were ordered to be closed. The Conservator of Forests has been directed to arrange for cutting grass in the Malnad forests of Shimoga and Kadur and to supply it to the affected districts on requisitions from the Deputy Commissioners. With a view to secure increased facilities for water the construction of drinking water wells in tank beds has been ordered and a large number have already been sunk. In extreme cases, the grant of gratuitous relief has also been authorised.

2. *Loans.*—The provision for Takavi and Land Improvement Loans in the budget for the current year is Rs. 65,000. On the receipt of the Revenue Commissioner's report that conditions in Kolar, Tumkur and Bangalore Districts were unfavourable, Government authorised

the Revenue Commissioner to withdraw the allotments made for other districts and place larger sums of money at the disposal of the Deputy Commissioners of these three districts. Instructions were also issued that loans should be granted freely and promptly. An additional sum of Rs. 45,000 has been granted for loans. A further sum of Rs. 25,000 was sanctioned for subsistence loans. As it is reported that the amounts provided till now have not been adequate to meet the applications so far received, Government are pleased to direct that an additional sum of Rs. 90,000 be placed at the disposal of the Revenue Commissioner for meeting the loan requirements of Kolar and Tumkur districts up to the end of March 1924. A sum of Rs. 30,000 has been sanctioned for restoring to the other districts their allotments which have been withdrawn by the Revenue Commissioner for utilisation in the affected tracts. From the information furnished by the Deputy Commissioners at the meeting, Government observe that large sums of money have been sanctioned on account of subsistence loans. Government desire to point out that the grant of subsistence loans should be ordered only after careful enquiry and should be confined to the localities where the condition of the people requires such help. Indiscriminate grant of subsistence loans while it may not afford much relief to the people to whom it is given may on the other hand have very demoralising effects. The expansion of village and public works will afford the people the necessary relief. Raiyats in the affected area should be encouraged to take land improvement loans wherever possible. This will not only stimulate the construction of works which will afford employment to the labouring classes but will also lead to a permanent improvement of the condition of the people. The total grant on account of loans will thus stand as follows:—

	Rs.
Provision in the budget	65,000
Additional grants sanctioned till now	45,000
Grants for subsistence loans	25,000
Additional grant now sanctioned for Kolar and Tumkur	90,000
Do. do. for other districts	30,000
Total ...	2,55,000

Government direct that due care be exercised by the Revenue Officers of all grades in the disbursement of loans and that all *bonafide* applications must be promptly disposed of.

3. *Tank Maintenance Works.*—Tank maintenance works are a very useful class of works in a season like the present when the agricultural classes are eager to secure employment. They consist purely of earth-work and can be made available to the people in close proximity to their villages. Government desire to emphasise the desirability of taking up this class of works on an extensive scale. From the reports made by the Deputy Commissioners Government observe that the procedure so far followed has not been quite uniform or regular. Expenditure on account of tank maintenance is of the nature of an advance, which has to be recovered from the raiyats who are responsible for maintaining the bunds of their tanks up to standard. Under the existing orders the raiyats' liability is limited to one year's assessment. Government are pleased to direct that all tank maintenance works in which the cost of the work is not in excess of one year's assessment on the atchkat may be undertaken at once without previous sanction. The execution of works, in which the cost of maintenance work to be done exceeds one year's assessment imposes a liability on Government. In regard to such works the estimates should be submitted for sanction so that Government may be able to ascertain the exact liability that will be thus thrown on them which will have to be provided for in the Revenue account. As regards tank maintenance works which in view of the urgency of the situation have already been started, although the cost is more than a year's assessment they may be completed without delay but the Deputy Commissioners are requested to submit at once a list of such cases showing the additional liability that is thrown on Government. The lists should be submitted so as to reach Government before 15th of January 1924. On receipt of this information Government will pass orders sanctioning a fixed sum of money from which the liability of Government in excess of the raiyat's share will be met, so that additional works may be undertaken according to the needs of the situation.

4. *Tank Restoration.*—As it is reported that tank maintenance, village improvement and other works will afford sufficient employment to the people for the present, Government consider that no tank restoration works either major or minor need be undertaken outside the budget programme. If, however, in any particular locality suitable tank maintenance or village improvement works are not available and it is considered necessary to start fresh restoration works, the Chief Engineer for Irrigation should in consultation with the Revenue Commissioner submit proposals with detailed estimates for sanction. Government also consider it necessary that the Engineering Department should investigate the adequacy of the sanctioned programme of works in the different affected areas and have projects in readiness so that in the event of seasonal conditions continuing to be unfavourable, there may be no difficulty in starting works and in finding adequate employment to the people. The Chief Engineer for Irrigation is requested to submit by the end of February a programme of

restoration works sanctioned and ready or for which raiyats have paid contributions which may be taken up if employment has to be provided for the people till the end of June 1924.

5. *Village Improvement Works.*—A sum of Rs 25,000 has been provided in the budget for expenditure under this head. In Government Order No. 1679-83—R M. 1123-28, dated 12th October 1923, a sum of Rs. 5,000 has been sanctioned for Village Improvement Works in Tumkur District. In Government Order No. R. 2582-93—R. M. 11-23-104, dated the 7th December 1923 a sum of Rs. 1,000 to each of the affected taluks has been earmarked for Village Improvement Works out of the sum of one lakh of rupees sanctioned in Government Order No. 2276-87—R M. 11-23-71, dated 22nd November 1923. The provision made for Village Improvement Work thus appears to be sufficient for the present. Information is not available as to the amount that has already been expended under this head. The question was raised that in view of the unfavourable seasonal conditions, the raiyat's share of the cost of village improvement work should be waived. Government consider that no general order waiving the contribution seems to be called for at the present stage. The cost of the raiyat's share of the work may be given as an advance in all cases in which the leading people of the village come forward to execute muchalikas to repay it. In other areas, preference should be given to tank maintenance works for affording employment to the people. In extreme cases where the people are unable to pay their share of the contribution and no other suitable employment can be found, the Revenue Commissioner may exercise his discretion and relax the rules.

6. *Gratuitous Relief.*—Government have already authorised the grant of gratuitous relief in extreme cases the expenditure being met out of the imprests granted to the Amildars. As it is desirable to fix a maximum for the purpose, Government are pleased to direct that the expenditure under this head be limited to a maximum of Rs. 1,000 each in the districts of Kolar and Tumkur and to Rs. 200 in the Bangalore district till the end of March 1924.

7. *Relief to Weavers and Artisans.*—The question of affording relief to weavers and artisans and also to people who on account of their social customs or scruples will not leave their houses will be separately considered.

8. *Fodder.*—Owing to the failure of the ragi crop and to the shrinkage in the wet cultivation, the difficulty for fodder in the affected areas has become great. With the approach of summer this difficulty is likely to become greater. The Deputy Commissioners report that the raiyats have already begun to dispose of their cattle for small prices. It is necessary to take all possible measures to secure that the cattle resources of the people are conserved to the maximum extent possible. The fodder depots opened in September and October in parts of the Kolar and Tumkur districts did not yield successful results. The quantity that could be handled was limited and the prices at which they could be secured were beyond the means of the poorer population. In the Government Order of the 8th December, the Conservator of Forests was requested to cut grass in the malnad forests in Shimoga and Kadur and to arrange for its supply to the affected tracts on the requisition of the Deputy Commissioners. As it is felt that the quantity that could be transported into the affected areas would necessarily be limited in view of the restricted facilities for transportation available, it has been decided to cut as much grass as possible and stock it in convenient localities in the malnad itself. This grass will be made available free of cost to cattle that are taken to the malnad from the affected tracts. The Deputy Commissioners are requested to give wide publicity to this arrangement. The Agricultural Department will be requested to provide suitable camping grounds for the cattle moving towards malnad and debit the cost to the lumpsum now placed at its disposal for the purpose. Dr. Coleman has suggested the advisability of providing for additional relief by keeping at a Central Depot a stock of fodder in reserve for sale to raiyats at bare cost price. He has also suggested the starting of an experimental feeding camp in the Maddagiri taluk where fodder conditions are most unsatisfactory. In this camp, cattle are proposed to be fed on a mixed diet consisting of prickly pear, straw and concentrated food. This experiment is reported to have been made in the Bombay Presidency with very successful results. The proposed experiment is to be made with a view to find out if the scheme is likely to yield good results in Mysore and if so, it may be further extended. Government accept Dr. Coleman's proposals which, however inadequate to meet the fodder situation as a whole, is sure to minimise the great economical loss that now stares in the face the agricultural population of the affected tract.

9 The following grants are placed at the disposal of [illegible] of Agriculture :—

	Rs.
Advance for stocking a reserve of fodder	30,000
Concentration camps for feeding cattle in the malnad and provision for camping grounds enroute.	17,000
Experimental feeding camp in Maddagiri	3,000
Total	50,000

The grants are to be operated upon on proper estimates which the Director of Agriculture is requested to submit for sanction with details of anticipated expenditure including establishment at an early date. In the meantime a sum of Rs. 10,000 is allowed to be drawn by him immediately to start operations. In regard to the cutting of grass, a sum of Rs. 5,000, has already been sanctioned by Government. In view of the decision to stock a larger quantity of cut grass in the malnad, larger grants will have to be placed at the disposal of the Conservator of Forests, and he is requested to submit an estimate of the amount required for securing a supply of about 2,000 tons of grass based on the experience already gained.

10. *Drinking Water.*—In order to provide for drinking water in areas in which scarcity of water has been felt, Government have already indicated the necessity of excavating temporary wells in tank-beds, and expenditure on this account has been ordered to be met out of the sum of one lakh sanctioned in Government Order of 22nd November 1923. It is reported that a large number of them have already been sanctioned in the districts of Kolar and Tumkur and that several more estimates are under consideration. It was ascertained at the meeting that the construction of these wells had, in some cases, been transferred to the Local Boards. As this procedure is likely to create dual control and confusion in the accounts, Government direct that the temporary well scheme be administered solely by the officers of the Revenue Department.

11. *Irrigation Wells.*—Government consider it necessary to encourage as far as possible the construction of new irrigation wells and the repairing and deepening of existing Kapale wells in which water has failed or has gone down to a low level. In the maidan portions of the State these wells serve as a kind of insurance against drought in years of scanty rain-fall. Government have therefore resolved to sanction a scheme for the execution of all such works on a large scale. For the present a small staff consisting of a well-overseer with the necessary tools and plant will be employed under the Agricultural Department to render the necessary assistance to raiyats to repair the existing wells and to sink new ones. A sum of Rs. 1,760 is sanctioned for the purpose for a period of four months to be utilized as noted in the margin. The work should be started immediately. The Deputy Commissioners are requested to give wide publicity to this scheme and encourage raiyats to put in applications for loans for this purpose. The question of starting a larger campaign for the sinking of irrigation wells with the aid of improved appliances and technical advice is under the active consideration of Government.

	Rs.
1 Well overseer	100 per month
1 Sub-overseer	30 ,,
Travelling Allowance	60 ,,
Lumpsum for the purchase of necessary portable tools and other accessories	1,000

12. *Wages.* As the execution of the majority of works will devolve on the Public Works Department the discretion of fixing wages must vest primarily in the Executive Engineers who should ordinarily consult the Deputy Commissioners in the matter. The rates should not be too extravagant and should under no circumstances exceed the ordinary scheduled rates. At the same time care should be taken to see that the rates give the labourer a fair living wage, have a direct relationship to the prices prevailing in the neighbourhood for ragi and make some allowance for the dependants and children not coming to the works. Each Executive Engineer will submit in advance weekly for the information of the Revenue Commissioner and the Chief Engineers of the Public Works Department a statement of the rates of wages paid by him for all kinds of relief works started under his control The Amildars should adopt these rates to secure uniformity. If there is any difference of opinion between the Public Works Department and the Revenue Department on the subject a reference should be made to Government.

13. *Establishment for Public Works Department.*—In order to secure that works are carried out efficiently some addition to the establishment appears to be necessary. Government will now authorise the Chief Engineer to incur expenditure on account of establishment up to a limit of 10 per cent of the actual expenditure incurred on the works. This amount will be inclusive of the cost of the temporary establishment already sanctioned.

14. *Establishment for Revenue Offices.*—Each affected taluk will be given a clerk on Rs. 25 and for each of the seriously affected taluks a special shekdar also will be sanctioned to assist the Amildar in the relief operations. The Revenue Commissioner is requested to send a list of taluks to which establishments should be sanctioned on the above basis. A clerk on Rs 40 is sanctioned for each of the district offices of Kolar, Tumkur and Bangalore to attend to the compilation of accounts, returns, etc., pertaining to distress relief, and similarly one accountant on Rs. 50 is sanctioned to the Revenue Commissioner's Office in addition to the staff already entertained for the purpose. Government desire to impress on the Revenue Commissioner the necessity of maintaining proper accounts of all expenditure incurred, classified under the various heads, according to Government sanction. When the present allotments are found inadequate a special report should be made to Government fully accounting for them and estimating further requirements up to 30th June 1924 if necessary.

No. 49-63—D., dated 26th December 1923.

Government request the Revenue Commissioner to show the expenditure in the returns under the main classifications, *viz.*, those treated as advance and those treated as out-right expenditure under the grants sanctioned for the purpose for each class of work. The Comptroller is requested to ledger all expenditure on relief operations in his office under a special head, and see that all bills are audited with promptness and care.

15. *Stationery.*—Government desire to emphasise the necessity to secure that scriptory work and routine correspondence is reduced to the lowest minimum possible. A list of only essential forms of accounts and bills must be prepared in consultation with the Comptroller and sent to Government for sanction, and the Superintendent of the Government Press will undertake only such printing work as is specially authorised by Government. Reports to Government should be concise and to the point and based on personal inspection. All elaborate forms should be avoided.

16. *General.*—Government trust that officers of all departments engaged in carrying out the operations now indicated in this order will act with quickness and decision showing at the same time a liberal measure of sympathy, while giving effect to the detailed instructions now issued and those already given in the previous orders on the subject.

K. V. ANANTARAMAN,
Offg. Secy. to Govt., Rev. Department.

To —The Revenue Commissioner in Mysore.
The Director of Agriculture in Mysore.
The Conservator of Forests in Mysore.
The Chief Engineer, Roads and Buildings.

RESTORATION OF TANKS AS SUGGESTED BY THE AMILDAR.

No.	Name of tank.	Mgd. No.		Cost.	Remarks.
1.	MIDGESHI HOBLI.				
	Kasapur tank	Mn.		2,000/-	Restored tank. The ryots want the raising of the weir and stoppage of the percolation.
2.	Bramhadevarahalli Basavankere.	Mn.		500/-	Restored tank. Sluice leaky. The proposal seems to be the raising of the weir.
3.	Chimmenhalli Jarikatte			1,200/-.	Breached kattey with a poor catchment, bund overgrown with jungle.
4.	KODIGENHALLI HOBLI				
	Thingalur Narasimhaayengarkere.	MJ	201.	10,000/-	Major tank. Project being modified.
	PURAVARA HOBLI.				
5.	Gondihalli tank.	Mn.		2,000/-	New one.
6.	Govindanhalli tank.	Mn.		2900/-.	New one.
	KORATAGERE HOBLI.				
7.	Hulikunte.	Mn.		2,000/-.	
	HOLAVANHALLI HOBLI.				
8.	Baraka tank.	Mn.		4,000/-	
9.	Devarahalli katte.	Mn.		2,000/-	
10	Venkatapur katte.	Mn.		2,500/-	The cost entered is only approximate.
11	Gavigunte.	Mn.		5,000/-
